B2B Revenue Strategy & Projection

Pakistan Healthcare SaaS Market · April 2026

Pakistan's digital health market is projected to reach **USD 752 million by 2029**, growing at 7.23% annually. Annual healthcare spending exceeds **Rs. 1,500 billion**, yet no unified B2B SaaS platform currently dominates the sector. MedLink's integrated stack — connecting doctors, labs, and pharmacies — positions it to capture significant market share through a tiered subscription model targeting clinics, diagnostic centers, and hospital chains.

* Transaction fees from pharmacy orders, lab bookings, and Stripe payment processing (2-3% per transaction) — additional upside on top of subscriptions.

Strategic Priorities

Phase 1 — Urban First	Launch in Karachi, Lahore, Islamabad. Sindh Telemedicine Act already provides regulatory cover for Karachi.
Growth Tier Focus	Mid-size clinics (5-20 doctors) are the sweet spot — large enough to pay Rs. 25K/mo, small enough to onboard quickly.
Urdu UX	Urdu-language interface and training material will dramatically increase adoption beyond digitally-literate early adopters.
Minimize Churn	Churn is the #1 risk. Prioritize smooth onboarding, local support staff, and quarterly check-ins to hit 85%+ retention.
Market Penetration	400,000+ registered doctors + 1,000+ private hospitals in Pakistan. Even 1% penetration = Rs. 1B+ addressable market.
